

Hazem Mejri

Full Stack Engineer · Node.js / NestJS · React / Next.js

(+216) 29 854 665 | hazemmejri55@gmail.com | linkedin.com/in/hazem-mejri | Sousse, Tunisia

PROFESSIONAL PROFILE

Full Stack Engineer with 4+ years building **Node.js / NestJS** and **React / Next.js** SaaS platforms across **e-commerce** and **hospitality**. Delivered a **70-module B2B e-commerce platform** (idempotent order processing, distributed locking, CASL authorization) and a real-time **PMS / OTA** system integrated with **Booking.com, Expedia and SiteMinder**. Reduced production **response time by up to 50%** and reviewed **1,000+ pull requests**; recognized for code quality and technical mentoring.

PROFESSIONAL EXPERIENCE

Full Stack Engineer — NestJS / React (Freelance)

Feb. 2026 – Present

Auvelisse

Portugal — Remote

- Designed and developed a large-scale, **integration-heavy PMS & OTA distribution** platform for the hospitality industry (**NestJS, React, TypeScript, PostgreSQL**), with real-time synchronization to **Booking.com, Expedia and SiteMinder**.
- Architected a **provider-agnostic OTA integration engine** that hides channel-specific differences behind a unified abstraction, so new channels are onboarded with isolated changes instead of per-channel branching logic.
- Designed a **canonical reservation model** that normalizes heterogeneous OTA payloads (**OTA XML + REST/JSON**) into a single internal contract, shielding downstream services from raw provider formats.
- Implemented the full **reservation lifecycle** — bookings, modifications, cancellations, multi-stays, fee calculation — with **atomic transactions and deduplication** to prevent duplicate bookings, plus availability synchronization to avoid overbooking.
- Engineered **asynchronous, resilient backend services (BullMQ, Redis, TypeORM)** on a **queue-offload pattern** that keeps inbound API responses fast, with automatic retries and failure handling for reliable event processing.
- Drove the module with a **test-first (TDD)** approach in **Jest**, reaching ~80% test coverage on core reservation logic.

Stack : NestJS · TypeScript · React · PostgreSQL · TypeORM · BullMQ · Redis · MinIO/S3 · Docker · REST APIs · OTA XML · Jest

Full Stack Engineer — NestJS / React

Feb. 2023 – Present

Anypli

Sousse, Tunisia

- Designed and developed **Tejer**, a B2B e-commerce platform (**NestJS API + React** back-office) structured into **70 business modules** on a controller–service–repository architecture; reusable abstractions **accelerating development by 30%**.
- Engineered **idempotent, queue-based order processing (Bull + Redis)** with a custom transactional decorator and **distributed locking (Redis mutex)**, safely serializing concurrent mutations across a **PM2** cluster.
- Implemented a **fine-grained policy-based authorization** system (**CASL policy**) and **dual authentication** (staff & API clients) with JWT access/refresh rotation and OTP via SMS.
- Developed the **React back-office (Redux Toolkit / RTK Query)** with server DTO isolation and *single-flight* JWT refresh; applied code splitting and memoization to **reduce memory usage by 33%**, and led an **internal workshop on React table virtualization** for high-volume data rendering.
- Modeled **56 relational entities** (TypeORM) and optimized order/reporting queries with **targeted and full-text indexes** and **Redis cache-aside**, reducing production response time by 50%.
- Exposed a **versioned, partner-facing public API (Dokana)** with isolated JWT auth and dedicated OpenAPI; containerized and hardened the platform (**Docker Compose, PM2, nginx, Helmet CSP/HSTS, rate limiting, XSS sanitization, ClamAV upload scanning**).
- Established the team's quality standards (**SonarCloud quality gates**, Bitbucket Pipelines, Husky / lint-staged / commitlint) while **reviewing 1,000+ pull requests**, onboarding **2 developers** and mentoring **4+ interns**.

Stack : NestJS · Node.js · TypeScript · React 18 · Redux Toolkit · RTK Query · TypeORM · MySQL · Redis · Bull · CASL · PM2 · Docker · nginx · SonarCloud · k6 · Jest · Agile Scrum

- Developed the interface of a **reactive CRM** in **React, TypeScript and TailwindCSS** for a modern, highly interactive user experience.
- Set up a **modular, scalable NestJS boilerplate** (**Docker, Redis, AWS S3 / MinIO**) to standardize new projects and improve maintainability.

Stack : React · TypeScript · TailwindCSS · NestJS · Docker · Redis · MinIO / AWS S3

TECHNICAL SKILLS

Backend : Node.js, NestJS, TypeScript, REST API, API architecture, OpenAPI, Event-driven & distributed architecture, WebSockets, Bull / BullMQ, idempotency, distributed locking, Jest

Frontend : React 18, Next.js, TypeScript, Redux Toolkit / RTK Query, Tailwind CSS, code splitting, virtualization, performance optimization

Data : PostgreSQL, MySQL (optimization, indexing, full-text), Redis (cache-aside: TTL, invalidation), MongoDB, TypeORM (migrations)

Security : CASL (policy-based authorization), JWT (access/refresh rotation), OTP, Helmet (CSP/HSTS), rate limiting, XSS sanitization, ClamAV, config validation (Joi)

Cloud & DevOps : Docker / Docker Compose, CI/CD, Nginx, PM2, SonarCloud, Bitbucket Pipelines, New Relic, Azure

Methodologies : Agile Scrum, GitFlow, Code Reviews, Design Patterns, Mentoring

EDUCATION

National Engineering Degree in Teleinformatics

Sept. 2019 – June 2022

Institut Supérieur d'Informatique et des Technologies de la Communication (ISITCom)

Hammam Sousse, Tunisia

Bachelor's Degree in Telecommunications

Sept. 2016 – June 2019

Institut Supérieur d'Informatique et des Technologies de la Communication (ISITCom)

Hammam Sousse, Tunisia
