PROFILE

Digital product developer who designs and builds websites, mobile apps, e-commerce and AI-powered products from first idea to shipped platform. Currently completing an engineering degree in Artificial Intelligence & Data Science at Polytechnique Sousse, with four live products already delivered for industrial, luxury retail, mobility and consulting clients. I own the full cycle — research, UI/UX, development, deployment and iteration after launch.

Availability: Freelance, full-time and international recruitment — open to relocation, travel, remote or on site

TECHNICAL SKILLS

Web & product: React, TypeScript, JavaScript, HTML, CSS, responsive UI, e-commerce, UI/UX

Backend & data: Node.js, Python, REST APIs, PostgreSQL, C / C++

Mobile & geolocation: Cross-platform mobile apps, mapping, live location, field-ready workflows

AI & data science: Data analysis, machine learning fundamentals, AI features integrated into products

AI & automation tooling: GitHub Copilot, Cursor, ChatGPT, Claude, Gemini, n8n, Make, Zapier, Midjourney

Delivery: Deployment, version control, testing & debugging, post-launch iteration

SELECTED WORK

U2I — Univers Inox Industriel *Website · Industrial* Complete industrial website built around technical credibility, clear expertise and a direct client journey. Presents sectors served, machine fleet, certifications and partner network.

VoltMap *Mobile app · Geolocation* Mobile geolocation product helping drivers discover EV charging infrastructure across Tunisia — 50+ stations in 16 regions, with real-time availability, turn-by-turn navigation and community moderation.

Gulf Diamond *E-commerce · Luxury* Bilingual (AR/EN, full RTL) luxury e-commerce experience balancing premium storytelling with an effortless shopping journey. ([gulfdiamond.netlify.app](#))

Think2Sell *Website · Agency* High-impact agency website with a sharper message, strong service hierarchy and conversion-led structure. ([think2sell.com](#))

EXPERIENCE

Intern — Product Development — *Continuous Net* Jun 2025 – Aug 2025

- Contributed to VoltMap, an EV-charging locator platform covering 50+ stations across 16 Tunisian regions.
- Tested and debugged map, navigation and station-status features to keep the experience fast and reliable.
- Worked with the team to integrate new features and improve overall user experience.

Workshop Assistant — *U2I — Univers Inox Industriel* Jun 2024 – Jun 2025

- Designed and built the company's corporate website end to end, translating industrial processes into clear client-facing content.
- Performed quality checks, packaging, labeling and inventory tracking on the production floor.

Sales Agent — *Mall of Sousse — Summer Job* Jun 2023 – Aug 2023

- Advised customers, resolved issues quickly and kept the floor organized in a high-traffic retail environment.

EDUCATION

Engineering Degree — AI & Data Science — *Polytechnique Sousse* Sep 2023 – Jun 2028

Baccalaureate, Mathematics (Scientific Track) — *Lycée Salem Ben Hmida — Akouda, Sousse* Jun 2021
