

SARY BOUKADIDA

Software Engineer

CAREER PROFIL

Highly motivated and detail-oriented Software Engineering student and developer with strong experience in designing, developing, and deploying software applications across web, desktop, and mobile environments. Skilled in full-stack development, with hands-on experience in building scalable systems, APIs, and user-focused interfaces. Proficient in software design principles, debugging, and problem-solving, with a strong ability to quickly learn new technologies and adapt to complex technical challenges.

- 3 Khair Din Street Sousse 4000

EDUCATION

- Bachelor of Computer Science
ESSTHS University
2021 - 2024
- Data Science and Ai Engineering
Polytechnique University
2024 - present

SOFT SKILLS

- Leadership
- Teamwork
- Time management
- Ability to work under pressure
- Deadline management
- Communication
- Problem-solving

TECHNICAL SKILLS

- Programming Languages:
 - Java
 - JavaScript/TypeScript
 - SQL
- Backend Development:
 - Spring Boot
 - NestJS
 - Node.js/BunJs
 - Express.js
 - RESTful APIs
- Frontend Development:
 - Angular
 - React.js
 - HTML5
 - TailwindCSS/CSS5
- Databases:
 - PostgreSQL
 - MongoDB
 - SQLite
- Tools & Technologies:
 - Git
 - GitHub
 - Postman
- Mobile Development
 - Android Development:
 - Java
 - Kotlin
 - React Native
- Software Concepts:
 - Object-Oriented Programming (OOP)
 - MVC architecture
 - Microservices basics
 - DebugginG

WORK EXPERIENCE

- Full Stack Software Engineer
Technocode
Sep 2024 - Present
 - Machine Monitoring Platform
 - Developed a scalable industrial monitoring platform to track and manage the real-time status of multiple machines across large-scale factory environments, enabling centralized supervision and operational efficiency.
 - Event Management System
 - Built a full-featured event management application covering the entire lifecycle of events, including event creation, planning, participant registration, and check-in management.
 - Delivery Planning & Fleet Management System
 - Designed and implemented a logistics platform for delivery operations, including vehicle management, accident tracking, fuel consumption monitoring, and advanced route planning and optimization.
 - Inventory Management Applications (Mobile)
 - Developed multiple mobile inventory management applications supporting stock tracking, barcode handling, and real-time data updates for operational use.
- Internship
Technocode
Jan 2024 - Jun 2024
 - Inventory Management System (Barcode & RFID)
 - Developed a comprehensive inventory management application integrating barcode scanning and RFID technology for efficient asset tracking and identification. The system supports full asset lifecycle management, including stock control, real-time updates, and organized asset categorization to improve operational accuracy and traceability.
