EXPERIENCE

• Value

January 2026 – July 2026

Full Stack Mobile Development Internship Project

Lac 1, Tunisia

- A live, subscription-based production platform for exploring global cultural heritage — books, places, and partner venues. Its flagship feature lets users chat with any book: a RAG-powered assistant answers with grounded citations and responds with GenUI, streaming interactive timelines, comparison tables, flashcards, and quizzes instead of plain paragraphs. I worked across all three layers: the Spring Boot microservices backend, a serverless RAG agent, and the Flutter mobile app.
- Delivered mobile features across three environments (dev, QA, UAT) within a cross-functional Agile Scrum team, coordinating with backend and design to ship production releases.
- **Mobile Development:** Flutter app Gen UI, Flavors (environments), AutoRoute (navigation), Bloc & Riverpod (state management), Dio (networking), Clean Architecture, Hive (local storage), Google Maps integration, Text-to-Speech
- **Backend Development:** Spring Boot / Java 11 microservices (Spring Cloud Gateway, Eureka, Keycloak/JWT) with OpenAI, Stripe, MongoDB/MySQL/Redis and Azure Blob Storage.
- **Agent Development:** stateless, serverless RAG service (TypeScript, Hono, Cloudflare Workers) on the OpenAI Responses API, with vector stores, citations and SSE streaming.
- **Tech Stack:** Flutter, TypeScript, Spring Boot (microservices architecture), MySQL, Agile Scrum, Jira, GitLab
- **Additional Expertise:** AI-assisted development (Claude Code: skills, MCP), OpenAI API integration, Agile Scrum ceremonies, Stripe payment gateway

• ComunikCRM

June 2025 – Aug 2025

Mobile Development Internship Project

Manar 2, Tunisia

- Built VoIP calling into the CRM's mobile app end-to-end: SIP registration and call setup with sip_ua, plus real-time voice/video over WebRTC.
- Designed a native incoming-call UI with flutter_callkeep, surfacing calls through the OS call screen instead of an in-app notification to match native telecom UX.
- Integrated FCM push notifications to wake the call UI when the app was backgrounded or killed, and handled Wi-Fi/cellular network transitions to keep active calls from dropping.

• BEE CODERS

Feb 2023 – May 2023

Intern

Lac 1, Tunisia

- Built "EasyOut," a cross-platform Flutter app for restaurant reservations and ordering, from initial spec through a working production build.
- Implemented Firebase Authentication, Firestore, and Realtime Database to support secure multi-user reservations with live availability updates synced across devices.

EDUCATION

• Private Higher School of Engineering and Technology | ESPRIT

Sept. 2023 – Jan. 2026

Computer Engineering Program

Charguia, Ariana

• Higher Institute of Technological Studies of Sousse

Sept. 2020 – Jan. 2023

Bachelor's Degree in Information Technology

Sousse, Tunisia

PROJECTS

• HealthChain – Mobile App for Personal Medical Data Management

[🔗]

- Built a Flutter + NestJS/MongoDB app for secure personal medical record management, with OTP, JWT, and OAuth2 authentication protecting patient data.
- Added a caching layer to cut repeat-load times for medical record retrieval, and structured the app with MVVM + Provider for a maintainable, responsive UI.
- Integrated Roboflow for AI-based medical image classification and Firebase for real-time result notifications.

- **Trastify – Mobile App for Wallet, Credit Card, and Financial Document Management** [🔗]
 - Built a Jetpack Compose (Kotlin) + NestJS/MongoDB app for wallet, credit card, and financial document management, with JWT auth and role-based access control.
 - Implemented Tesseract OCR to auto-extract data from scanned financial documents, removing manual entry for uploaded receipts and statements.
 - Integrated Azure Cloud storage and Retrofit for reliable backend sync, structured with MVC for maintainability.

SKILLS

- **Programming Languages & frameworks:** Dart (Flutter), Kotlin (Jetpack Compose), Java (Spring Boot), JavaScript (NestJS, Node.js), Next.js, Python
- **Database Systems:** SQL (PostgreSQL, MySql), NoSQL (MongoDB), Firebase
- **Tools & Technologies:** UI/UX design principles, QA testing (ISTQB V4.0), SonarQube, Postman, Swagger, Docker, AI automation (n8n), RESTful APIs, Git, GitHub, UML, Stitch AI, GitLab CI/CD, Agile/Scrum, Trello, Jira, Roboflow, FlutterFlow, Image Optimization (FFmpeg), Vercel Deployment, Basic SEO, Web Scraping
- **Soft Skills:** Problem Solving, Critical Thinking, Creativity, Communication, Team Collaboration, Adaptability, Time Management

CERTIFICATIONS

- | | |
|--|-----------------------|
| • 9antra Certified Full Stack Mobile Development with Flutter | <i>June–July 2022</i> |
| • AWS Academy Graduate - Cloud Foundations | <i>Sept–Dec 2025</i> |
| • Generative AI with Diffusion Models | <i>Sept–Dec 2025</i> |
| • Applications of AI for Predictive Maintenance | <i>Sept–Dec 2025</i> |
