PROFILE

Full Stack Developer passionate about solving complex problems, with an analytical and creative approach to technical challenges. Versatile and autonomous, I work on both frontend and backend, adapting quickly to different business contexts and technologies. Experienced in .NET development (MVC/MVVM architectures, Entity Framework Core, SignalR), Sage management applications, and e-invoicing gateway integration.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan. 2024 – Present

APBS Groupe – Sage Management Solutions Integrator – Sfax, Tunisia

- Web development in .NET within the Sage division: design and development of business management applications (sales, inventory, accounting, production) following MVC and MVVM architectures.
- Implementation and integration of an e-invoicing gateway compliant with current regulations, connected to TTN (Tunisia TradeNet).
- Development of the data access layer with Entity Framework Core and implementation of real-time features (notifications, live dashboard updates) with SignalR.
- Involvement in all stages of the development cycle: functional analysis, architecture, detailed design, programming and testing.
- Design and development of interactive, ergonomic user interfaces with Vue.js and PrimeVue.
- Production, documentation and correction of programs according to functional specifications.
- Fast identification and resolution of issues encountered in development or production.
- Reporting and dashboards with Metabase, and workflow automation with n8n.

Tech stack: JavaScript, Vue.js, .NET (C#), ASP.NET MVC/MVVM, Entity Framework Core, SignalR, SQL Server, PostgreSQL, DevExpress, PrimeVue, Docker, Metabase, n8n, Crystal Report, Git

Full Stack Developer

Dec. 2022 – Dec. 2023

Infotech Consulting Services (ICS) – Sfax, Tunisia

- Creation of new REST APIs, testing and validation with Postman (backend side).
- Development of new backend services to support business features.
- Creation of frontend interfaces and pages to improve user experience.

Tech stack: Laravel, Nuxt.js, Vue.js 3, MySQL, Docker, Postman, JIRA

Developer

Nov. 2021 – Sep. 2022

Logicom – Sfax, Tunisia

- Follow-up and handling of customer complaints, development across ERP modules (sales, inventory, production, point of sale...).
- Testing and verification of developed modules, deployment of Crystal Report outputs.

Tech stack: C#, Visual Basic, Crystal Report, SQL, PHP

Intern (Final-year project)

Feb. 2020 – Jul. 2020

Leader Tec Engineering – Sfax, Tunisia

- Development of an inventory management application: suppliers, customer orders, products, invoices, quotes.

Tech stack: PHP, Java, JavaScript, Bootstrap, HTML5, Android Studio

EDUCATION

Master's in Information Systems and Network Development

Nov. 2022 – Dec. 2024

ISET Sfax – Software Engineering and New Technologies – Sfax, Tunisia

Bachelor's Degree in Computer Science

Sep. 2017 – Jun. 2020

ISIMS Sfax – Higher Institute of Computer Science and Multimedia – Sfax, Tunisia
