

SOUHA OMRANI

DATA SCIENCE ENGINEER|DATA OPERATIONS & ANALYTICS

✉ souhaomrani6@gmail.com ☎ +216-50 499 547 📍 Sousse,Tunisia

PROFILE SUMMARY

Data Science Engineer in training with a Software Engineering background and hands-on experience in data pipelines, ETL, data processing, data quality, analytics, and technical project development. Proficient in Python and SQL, with experience integrating data from diverse sources, automating data workflows, and working with cloud-based data technologies. Strong analytical and troubleshooting mindset, with experience translating complex data and technical requirements into reliable, practical solutions. Comfortable collaborating across technical and business teams.

PROFESSIONAL EXPERIENCE

Student Advisor - GOMYCODE

B2C Sales | April 2026 – August 2026 | Sousse

- Conducted consultations with prospects to understand their needs, goals, and career aspirations.
- Analyzed client needs and recommended appropriate technology training programs.
- Presented program details, answered questions, and handled objections to build trust and support decision making.
- Followed up with prospects throughout the enrollment process and contributed to lead conversion and student acquisition.

Sales Agent – Class Quiz

B2C Sales | Oct 2025 – February 2026 | Sousse

- Conducted outbound calls to parents, promoting Class Quiz subscriptions and understanding their children’s learning needs.
- Applied consultative selling and persuasive communication techniques to build trust and drive conversions.
- Tailored sales approaches to different customer profiles, handled objections, and addressed client concerns effectively.
- Developed strong expertise in B2C telesales, customer relationship management, and subscription based sales while meeting sales targets.

International Commercial - Ozeol

Prospection Team | Oct 2024 – Aug 2025 | Sousse

- Achieved 82% of objectives and secured multiple international deals through strategic prospecting and negotiation.
- Investigated supplier constraints and information gaps, adapting sourcing strategies and identifying alternative solutions.
- Leveraged CRM data analytics to identify business trends, optimize sales strategies, and increase lead conversion rates.
- Enhanced strong cross-border collaboration skills by working with multicultural teams in fast paced environments.

Summer Intern – ADVANCIA IT SYSTEM

Jul 2023 – Aug 2023 | Tunisia

- Streamlined the company’s digital documentation ecosystem by leveraging Microsoft 365 and structured data systems.
- Improved automated filing and version control methods, increasing data retrieval efficiency by 40%.
- Provided IT infrastructure support and optimized workflow tools to enhance usability for non-technical teams.
- Corporated with managers to digitize client files, reports, and meeting documentation, improving organization and accessibility.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Microsoft ISIMA Club – ISI Mahdia

Consultant 2024 – 2025

- Advised the team on event planning, organization, and club operations.

Organizer 2023 – 2024

- Organized technical events and coordinated logistics, participants, and team activities

General Secretary 2022 – 2023

- Coordinated club activities, managed internal communication, and supported administrative operations.

National Microsoft Technologies Camp (NMTC)

Human Resources – NMTC V2 (2023)

- Managed team coordination, member follow-up, and HR-related activities.

Risk Manager – NMTC V1 (2022)

- Identified potential event risks and implemented measures to ensure smooth event execution.

EDUCATION

2nd Year – Engineering Cycle, Data Science & AI
Specialization

2025 – Present | Polytechnique Sousse

- Currently pursuing the third year of the engineering cycle in Data Science.

Licence Degree in Computer Science, Software
Engineering Specialization

2023 – 2024 |Higher Institute of Computer Science Mahdia

- Graduated with “Excellent” distinction

PROJECTS

End-of-Study Project – SPAICY Inc

Feb 2024 – May 2024 | Sfax

- Designed and implemented a fully automated data pipeline to process large-scale satellite and telemetry datasets, reducing manual data handling by 70%.
- Streamlined custom ETL workflows to extract, clean, and integrate high-volume data from diverse sources, enhancing processing speed and data accuracy for remote sensing and geospatial analysis.
- Collaborated with data scientists and cloud engineers to optimize performance, ensure scalability, and contribute to defining architecture and reliability standards for a distributed data processing system.
- Expanded advanced expertise in Python, APIs, and cloud-based data orchestration platforms, while acquiring new skills in satellite data handling and pipeline architecture.
- Demonstrated adaptability and problem-solving by successfully delivering a technical project outside core study area, showcasing both technical depth and versatility.

AcademicProject–WildfireDetection from Satellite Imagery

- Built a machine learning workflow for land-cover classification using Sentinel-2 satellite imagery.
- Prepared and processed geospatial datasets using QGIS and related geospatial tools.
- Created labeled training data and applied a Random Forest classification model.
- Implemented data cleaning and validation steps to improve the reliability of model training.
- Investigated data overlap during validation and refined the dataset before evaluating model performance. • Achieved 98.82% cross-validation accuracy after addressing overlapping training data.

SKILLS

Core Strengths	Analytical Thinking · Troubleshooting · Communication · Adaptability · Quick Learning · Teamwork · Organization
Business & Client Relations	Consultative Selling · Needs Analysis · Prospecting · Negotiation · Client Relationship Management · Lead Conversion · Customer Advisory
Big Data & Cloud	Apache Spark · Hadoop · Cloud Storage Solutions · Cloud/Data Orchestration Concepts
BI & Visualization	Power BI· R / RStudio · Matplotlib · APIs · Predictive Modeling · Machine Learning
Data Science & Analytics	Data Analysis · Data Mining · Data Cleaning & Preprocessing · Exploratory Data Analysis · Predictive Modeling · Machine Learning · Data Quality & Validation · Data Visualization
Data Engineering & ETL	ETL Pipelines · Data Integration · Data Processing & Transformation · Data Ingestion · Automated Workflows
Programming & Databases	Python (Pandas, NumPy, Scikit-learn, TensorFlow) · SQL · MongoDB · NoSQL · JavaScript · HTML · CSS
Geospatial & Remote Sensing	QGIS · GDAL · GeoPandas · Rasterio · PDAL · Satellite Data Processing · Land Cover / Land Use Classification
