SUMMARY

Full Stack Java Developer with 3+ years of experience designing, building, and scaling 10+ production applications across e-commerce, ERP, logistics, education, and healthcare. Delivers systems end-to-end with **Java**, **Spring Boot**, and **Angular** (plus Node.js) — from requirements and architecture to secured REST APIs, relational data modeling, and Docker/AWS deployment. Experienced in role-based security (Spring Security, JWT), real-time features (WebSocket), and AI integration (OpenAI API, NLP) that automate business processes.

SKILLS

Core Stack: Java, Spring Boot, Angular, Hibernate, JPA, REST API, Maven, Docker, Git

Backend: Node.js, Express.js, Spring Security, JWT, SOAP API, PHP

Frontend: React, TypeScript, JavaScript, HTML, CSS, Electron

Databases: MySQL, PostgreSQL, MongoDB, Oracle Database, Microsoft SQL Server

DevOps & Tools: CI/CD, GitHub Actions, AWS, Nginx, Apache, Tomcat, Linux, Postman, Swagger, Jira, Agile/Scrum

AI & Realtime: OpenAI API, NLP, WebSocket, STOMP, SockJS

Systems & IoT: Raspberry Pi, IoT, RFID, NFC, barcode 1D/2D

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jul 2025 – Present

Declitech — Tunis

Development and evolution of production web products, from backend reliability and secured REST APIs to frontend delivery and cloud rollouts.

- Engineered 10+ full stack features with Spring Boot, Angular, REST APIs, and WebSocket, improving reliability, performance, and code quality.
- Integrated AI capabilities (OpenAI API) that cut manual handling of recurring user requests by about 30%.
- Automated CI/CD deployments to AWS with Docker, cutting release setup from about 2 hours to under 15 minutes.

Java, Spring Boot, Angular, REST API, WebSocket, OpenAI API, Docker, CI/CD, AWS, Git

Full Stack Developer

Feb 2025 – Jul 2025

Mod'art — Tunis

Training-center management platform delivered end-to-end, from needs analysis and architecture through development and technical coordination.

- Authored functional requirements and technical specifications covering 30+ user stories.
- Architected a modular Angular/Node.js codebase (15+ modules) with MongoDB and NgRx, used daily by staff and 200+ trainees.
- Established Docker-based CI/CD workflows on AWS, a suite of 100+ Postman REST API tests, and a maintainable, scalable project structure.

Angular, Node.js, Express.js, MongoDB, REST API, Postman, Docker, CI/CD, AWS, NgRx, Git

Full Stack Developer

Jun 2024 – Jan 2025

Tefer — M'saken

E-commerce operations platform with CRM (customer management), order processing, logistics connectivity, delivery tracking, notifications, and dashboards.

- Delivered 8 business modules — products, orders, customers (CRM), parcels, and anomaly detection — handling 500+ orders per month.
- Integrated 3 delivery-provider REST APIs to push status updates automatically, flagging delays and failures in real time via WebSocket.
- Secured access with role-based authentication (Spring Security, JWT, 4 user roles) and deployed to production behind Nginx with live monitoring views.

Java, Spring Boot, Spring Security, JWT, Angular, MySQL, REST API, WebSocket, Nginx, Jira

Freelance Software Developer

May 2024 – Aug 2024

M'saken

End-to-end delivery of business tools for local clients: a Point of Sale (POS) with inventory management, and a car-rental back office.

- Built a complete Point of Sale (POS) and inventory management solution with barcode-driven sales flows and real-time stock updates across 1,000+ products.
- Automated cash calculation and daily closing reports, cutting end-of-day reconciliation from about 1 hour to under 10 minutes.

- Modeled the persistence layer with Hibernate/JPA, optimized backend data handling for a fleet of 30+ vehicles, and resolved 20+ client-reported issues.

Java, Spring Boot, Hibernate, JPA, Angular, MySQL, REST API, Maven, Electron

PFE Internship | Web Developer

Feb 2024 – May 2024

Fenix — Ariana

Inventory Management System connected to online marketplaces and transport services.

- Implemented bidirectional synchronization of stock, orders, and item updates for 1,000+ product references.
- Integrated 2 transport APIs (Aramex, Intigo) via REST and SOAP for delivery-note generation and status monitoring.

Java, Spring Boot, Angular, PostgreSQL, REST API, SOAP API, Postman, Swagger, Maven, Scrum

Summer Internship | Web Developer

Jul 2023 – Aug 2023

MyServ — M’saken

Recruitment (HR) web application for candidate and hiring management.

- Designed the database schema and developed 3 core hiring modules with Spring Boot REST APIs, streamlining candidate tracking across the recruitment platform.

Java, Spring Boot, Angular, MongoDB, REST API, Postman, Swagger, Maven

Advanced Internship | Embedded System

Jan 2023 – Feb 2023

CRMN Technopole — Sousse

CubeSat antenna rotor control with Raspberry Pi and stepper motor.

- Assembled the stepper-motor control circuit (1.8° step precision) and programmed the antenna-pointing logic in Python.

Python, Raspberry Pi, Raspbian

Introductory Internship | Web Developer

Jan 2022 – Feb 2022

STIP — M’saken

Computerized Maintenance Management System (CMMS) web project.

- Analyzed requirements and designed the MySQL schema (15+ tables), backend, and web interface.

PHP, MySQL, JavaScript, jQuery, AJAX, Bootstrap, HTML, CSS, XAMPP

PROJECTS

School Management ERP | Full Stack

Jan 2025 – Mar 2025

Education ERP suite for student registration, records, billing, payments, and scheduling.

- Delivered 6 modules — student records (400+ students), invoicing, payment follow-up, classes, teachers, and timetable planning.
- Containerized the full stack into 3 Docker containers (app, REST API, database) deployed on a VPS.

Node.js, Angular, MySQL, REST API, Docker, VPS

AI-Cabinet-Reception | Intelligent Medical Assistant

Apr 2025 – Jun 2025

AI-powered medical reception assistant providing 24/7 automated responses to patient messages, FAQs, appointment requests, and urgency triage.

- Engineered a real-time appointment engine backed by MySQL, reducing scheduling conflicts to zero.
- Implemented NLP-based triage across 4 urgency levels and a React dashboard for history, statistics, and calendar views.

React, Node.js, Express.js, MySQL, REST API, OpenAI API, NLP

EDUCATION

Bachelor’s Degree in Computer Technology, Embedded and Mobile Systems

2021 – 2024

ISET de Sousse

Baccalaureate in Computer Science

2020

Lycée Farhat Hached, M’saken

LANGUAGES

Arabic: Native | French: Working proficiency | English: Working proficiency

STRENGTHS

- Completed 4 freelance projects end-to-end as sole developer — requirements, development, deployment, and client support.
- Progressed from intern to full-time Full Stack Developer in under 4 years, across 7 companies and freelance work.
- Self-taught AI integration (OpenAI API, NLP), applied in 2 production projects.
